

Taking on an Apprentice in Flooring Technology

The project provides career opportunities in the disciplines of Carpet, Timber and Vinyl installation.

The program **guides two groups** of students through the Certificate III Apprenticeship in Flooring Technology. Employers benefit from the support of **highly trained mentors** to support the relationship and development of the apprentice.

Group one is scheduled to commence training in **November 2018** with group two scheduled to commence in **February 2020**. Employers benefit from a training schedule where students study on campus in off-peak periods, and are made available to work with employers on-site, during the peak periods.

This pilot program is supported by the Victorian Government and endorsed by the National Flooring Trainers Network as a key supporter, assisting in **rolling out future programs** nationally across Australia.

Employers receive **financial compensation** via Australian Apprenticeships Incentives. For insights into what you may be eligible for see link: <https://www.australianapprenticeships.gov.au/aus-employer-incentives>

Success relies on students who will be placed with **host companies**, employed under a training contract.

During the **first 12 months**, the Victorian Government funded training program gives students an **opportunity to complete** more than half the units required for a Certificate III in Flooring Technology qualification.

MSF30813 Certificate III in Flooring Technology

Your Apprentice will complete 11 Core units to improve their on-site abilities, including:

- Work Safely
- Communicate in the Workplace
- Work in a Team
- Using Flooring Technology Sector Hand and Power Tools
- Receive and prepare floor covering materials for installation
- Plan and cost flooring technology work
- Establish and maintain a safe flooring technology work environment
- Make measurements and calculations
- Read and interpret work documents
- Handle dangerous goods/hazardous substances.

Once the core units are completed apprentices will complete 14 stream specific units based on your discipline/s (Carpet, Timber, Vinyl or Combined).

The majority of your apprentice's units will be assessed via practical demonstration, on-site, via brief visual assessments from qualified assessors.
